Filters and Filtration Handbook (5th Edition) - Knovel

The filters are divided by the force that causes filtration: vacuum (i.e., a negative pressure at the filter medium), gravity alone (i.e., the hydrostatic head of the liquid above the medium), centrifugal force (i.e., an amplified gravity effect), fluid

As air moves through a building's HVAC system, air filters trap and collect large and small particles such as dust, allergens and microorganisms.

According to the American Society of Heating, Refrigerating and Air-Conditioning Engineers (ASHRAE), this filtration helps provide healthier indoor air quality. A filter's MERV number indicates how it's rated
